The Recruitment Department

Generation Green

Dear Sir /Madam,

As a final-year Electronics and Communication Engineering student, I am excited about the opportunity to contribute to Generation Green while continuing to develop my technical skills in the renewable energy sector. .

Through my coursework and academic projects, I have gained hands-on experience in electronics and hardware testing. These experiences have helped me understand how to identify technical issues, evaluate hardware performance, and approach engineering problems with a logical mindset. Working on group projects has also taught me the importance of teamwork, communication, and collaborating effectively to achieve common goals.

I believe Generation Green will provide an excellent opportunity for me to develop professionally while building a strong foundation for my career. Thank you very much for your time and consideration.

Sincerely,

Mishelina Joby
